

Scrum Product Backlog		Team BOGO	
Priority	User Type	Description	Status
1	Standard User	I can see my results displayed on a screen	Complete
2	Standard User	I can input numbers by either mouse click or pressing keys	Complete
3	Standard User	I can add, subtract, multiply, or divide two numbers and get a result	Complete
4	Standard User	I can switch between different modes, such as	Complete
5	Standard User	I should not expect some of my results to be a	Complete
6	Developer	I can add an additional button on the calculator that performs a distinct task	Complete
7	Developer	I can add and implement additonal conversion	Complete
8	Developer	I can add more modes to the calculator	Complete
9	Standard User	I can convert from one unit to another, such as decimal to binary, or miles to kilometers.	In progress
	Developer	I can implement graphing with the Wolfram Alpha API	To do
	Developer	I can implement derivatives and integrals with the Wolfram Alpha API	To do
10	Developer	I can implement additional features using the Wolfram Alpha API	To do
11	Standard User	I can input basic arithmetic through the Wolfram Alpha API and get a result	To do
12	Standard User	I can input an equation and get it's graph back from the Wolfram Alpha API	To do
13	Standard User	I can input an equation and get back it's derivative	To do
14	Standard User	I can input a function and get its area under that function (An integral) (Wolfram Alpha API)	To do
